

Author Index—Volume 11 (1993)

(The issue number is given in front of the page numbers)

- Amodio, P. and D. Trigiante**, A parallel direct method for solving initial value problems for ordinary differential equations (1-3) 85–93
- Arney, D.C.**, see **Biswas, R.** (4) 259–282
- Bellen, A. and M. Zennaro**, Introduction (1-3) 1–2
- Bellen, A. and M. Zennaro**, The use of Runge–Kutta formulae in waveform relaxation methods (1-3) 95–114
- Biswas, R., J.E. Flaherty and D.C. Arney**, An adaptive mesh-moving and refinement procedure for one-dimensional conservation laws (4) 259–282
- Brezinski, C. and H. Sadok**, Lanczos-type algorithms for solving systems of linear equations (6) 443–473
- Brugnano, L., F. Mazzia and D. Trigiante**, Parallel implementation of BVM methods (1-3) 115–124
- Burrage, K.**, Parallel methods for initial value problems (1-3) 5–25
- Burrage, K.**, The search for the Holy Grail, or: Predictor–corrector methods for solving ODEIVPs (1-3) 125–141
- Butcher, J.C.**, Diagonally-implicit multi-stage integration methods (5) 347–363
- Chen, M. and R. Temam**, Incremental unknowns for convection–diffusion equations (5) 365–383
- Chiu, C.**, Optimal one-stage and two-stage schemes for steady state solutions of hyperbolic equations (6) 475–496
- Crisci, M.R., B. Paternoster and E. Russo**, Fully parallel Runge–Kutta–Nyström methods for ODEs with oscillating solutions (1-3) 143–158
- Dinavahi, S.P.G.**, A streakline method for computing two-dimensional vortical flows (4) 283–308
- El-Tarazi, M.N.**, see **Sallam, S.** (5) 419–427
- Flaherty, J.E.**, see **Biswas, R.** (4) 259–282
- Gasparo, M.G. and M. Macconi**, Parallel quasi-Newton techniques with applications to shooting methods (1-3) 159–167
- Gear, C.W.**, Massive parallelism across space in ODEs (1-3) 27–43
- Gear, C.W. and Xu Xuhai**, Parallelism across time in ODEs (1-3) 45–68
- Glaister, P.**, An efficient numerical method for subcritical and supercritical open channel flows (6) 497–508
- González-Vera, P. and M. Jiménez Paiz**, Two-point partial Padé approximants (5) 385–402
- Hromadka II, T.V. and R.J. Whitley**, Expanding the CVBEM approximation in a series (6) 509–516
- Jackiewicz, Z.**, Stability analysis of time-point relaxation Runge–Kutta methods with respect to tridiagonal systems of differential equations (1-3) 189–209
- Jiménez Paiz, M.**, see **González-Vera, P.** (5) 385–402
- Leimkuhler, B. and A. Ruehli**, Rapid convergence of waveform relaxation (1-3) 211–224
- Lopez, L. and D. Trigiante**, Boundary value methods and BV-stability in the solution of initial value problems (1-3) 225–239
- Loze, M.K. and R. Saunders**, Two simple algorithms for constructing a two-dimensional constrained Delaunay triangulation (5) 403–418
- Macconi, M.**, see **Gasparo, M.G.** (1-3) 159–167
- Mazzia, F.**, see **Brugnano, L.** (1-3) 115–124
- Orel, B.**, Parallel Runge–Kutta methods with real eigenvalues (1-3) 241–250
- Paternoster, B.**, see **Crisci, M.R.** (1-3) 143–158
- Pohl, B.**, On the convergence of the discretized multi-splitting waveform relaxation algorithm (1-3) 251–258
- Ruehli, A.**, see **Leimkuhler, B.** (1-3) 211–224
- Russo, E.**, see **Crisci, M.R.** (1-3) 143–158

- Sacco, R.**, Convergence of a second-order accurate Petrov-Galerkin scheme for convection-diffusion problems in semi-conductors (6) 517-528
- Sadok, H.**, see **Brezinski, C.** (6) 443-473
- Sallam, S.** and **M.N. El-Tarazi**, Quadratic spline interpolation on uniform meshes (5) 419-427
- Saunders, R.**, see **Loze, M.K.** (5) 403-418
- Sommeijer, B.P.**, see **van der Houwen, P.J.** (1-3) 169-188
- Tang, T.**, A finite difference scheme for partial integro-differential equations with a weakly singular kernel (4) 309-319
- Temam, R.**, see **Chen, M.** (5) 365-383
- Trigiane, D.**, see **Amodio, P.** (1-3) 85- 93
- Trigiane, D.**, see **Brugnano, L.** (1-3) 115-124
- Trigiane, D.**, see **Lopez, L.** (1-3) 225-239
- van der Houwen, P.J.**, Parallel step-by-step methods (1-3) 69- 81
- van der Houwen, P.J.** and **B.P. Sommeijer**, Analysis of parallel diagonally implicit iteration of Runge-Kutta methods (1-3) 169-188
- Whitley, R.J.**, see **Hromadka II, T.V.** (6) 509-516
- Xu Xuhai**, see **Gear, C.W.** (1-3) 45- 68
- Yuan, J.Y.**, The convergence of the two-block SAOR method for least-squares problems (5) 429-441
- Zennaro, M.**, Contractivity of Runge-Kutta methods with respect to forcing terms (4) 321-345
- Zennaro, M.**, see **Bellen, A.** (1-3) 1- 2
- Zennaro, M.**, see **Bellen, A.** (1-3) 95-114
